Bei der Verwendung von **essigfrei vernetztem** Spezialkleber und Schaumstoffklebeband empfehlen wir ein V in die Tülle einzuschneiden, somit lässt sich der Kleber besser applizieren. Dieser Klebestreifen hat dann eine Höhe von ca. 8mm, das Klebeband eine Höhe von ca. 2mm. Die Wand wird zuerst mit dem Kleber berührt, die Platte lässt sich noch justieren. Erst beim festen Andrücken der Platte an die Wand greift auch das Schaumstoffklebeband und fixiert die Position der Platte dauerhaft. Ebenso empfehlen wir das Sezten einer Dehnungsfuge gemäss Montageanleitung.
